WORK EXPERIENCE

UX Designer

ASTONISH · MAY 2023 - NOV. 2023

- Designed a responsive web layout ensuring graceful degradation for a desktop-based userbase across multiple platforms.
- Led usability testing sessions with users to identify opportunities for improvement to create a seamless user journey across multiple devices.
- Effectively communicated design concepts and solutions across teams to ensure visions and user needs were universally understood and solved.
- Conducted playtesting sessions to gather qualitative feedback on game balance, and actively responded to player feedback post launch to iteratively enhance gaming experience.
- Utilized TailwindCSS with Sass to enhance the user experience across different viewports and devices.

UX Designer & Community Administrator

FIREFLOWER · JUN. 2020 - SEPT. 2020

- Executed advertising strategies across various web platforms, resulting in an increase in user base and readership, averaging at 250 concurrent members.
- Collaborated within a group environment to create, edit, and maintain a comprehensive design system for brand recognition across web content.
- Designed narrative-driven web layouts, to enhance the user experience through immersion and brand recognition.
